LITTLE GIRAFFE™

PRODUCT FACT SHEET

LITTLE GIRAFFE™

The Giraffe chair was designed by Arne Jacobsen in 1959, specifically for the restaurant at the SAS Royal Hotel (today Radisson Collection Royal Hotel) in Copenhagen. Its high back and padded armrests make for a cosy and comfortable seat. The Little Giraffe™ chair is an evolution of its iconic predecessor – a striking rendition suitable for hospitality, meeting rooms or dining spaces.

ABOUT THE DESIGNER
The collaboration between Arne Jacobsen and Fritz Hansen dates back to 1934. It was not until 1952 however that the team got its breakthrough with the Ant™. It was succeeded by Series 7™ in 1955, thereby enabling both Jacobsen and Fritz Hansen to write their names into furniture history.

MODELS
3201: Fixed cover, 4 legs
3201R: Removable cover, 4 legs
3211: Fixed cover, height-adjustable, 5 castors
3211R: Removable cover, height-adjustable, 5 castors

MATERIAL
Shell: The shell is made of a combination of molded hard and soft (MDI) polyurethane foam, reinforced with steel frame and with glass fiber enforcement edges. The chair comes with either a fixed or a removable cover.

Base: The four-legged base is made of bended steel tubes which are either chromed or powder coated. The star shaped base with castors is made of die-cast aluminium with a satin polished or powder coated finish. The base can be configured with either castors with aluminium housing (height adjustable with tilt mechanism) or black-grey plastic toes (fixed seat height with spring function). Glides, cover cap and castor rims are made of plastic.

PRODUCTION PROCESS
Shell: The backrest is made from PUR-foam moulded around an inner steel frame. The seat is also made from PUR-foam moulded around a steel frame with nozag springs. The two pieces are upholstered individually and assembled.

Base: The steel base is made from bended and welded steel tubes and is available in either chromed steel or powder coated steel. Fritz Hansen uses both trivalent chromium (Cr3) and hexavalent chromium (Cr6) for chromium plating. Fritz Hansen will convert to solely using trivalent chromium (Cr3) when the capacity in the Industry allows it.

REPAIR, DISPOSAL AND REUSE
In the case of disposal, the chair can be disassembled into two parts (shell and base). The shell requires special handling because of the embedded steel frame. After separating foam and steel, both items can be recycled. Check local regulations for recycling options and whether there is potential for reuse.

WARRANTY
Fritz Hansen provides a five-year warranty on standard products against defects in materials and workmanship. An extended warranty of up to twenty years is provided on selected products provided they have been registered online on **fritzhansen.com/my-fh.**
