Slow Chair (knit)

Ronan & Erwan Bouroullec, 2006

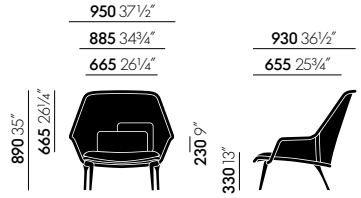

The design of the Slow Chair and the Slow Sofa uses the principle of a textile sling cover precisely fitted over a tubular steel frame. This creates a sink-in effect with just the right amount of tension to ensure appealing comfort, especially when supplemented with loose cushions. Due to the absence of thick padding, the compact Slow Chair and Slow Sofa offer generous space for one or two people. Thanks to their light weight, the armchair and sofa can be easily picked up and moved around and provide a favourite flexible spot to escape the hustle and bustle of everyday life. With their distinctive aesthetic, they integrate seamlessly into modern interiors while adding a contemporary touch to classic settings.

The Slow Chair (knit) has a light and airy, understated aesthetic, thanks to the armchair's translucent high-tech knit sling cover and graceful contours.

Materials

- **Frame/cover:** tubular steel frame with extremely strong, precisely shaped knitted fabric which is stretched over the frame.
- **Upholstery:** recyclable polyurethane foam ‚V-Foam' and polyester fibre, including a seat cushion and two backrest cushions.
- **Seat height:** 330 mm (applied load 230 mm, measured in accordance with EN 1335-1).
- **Base:** polished or powder-coated die-cast aluminium.
- **Glides:** all legs fitted with hard glides for carpet; felt glides optionally available for hard floors.
- **Applications:** recommended for domestic use only.

DIMENSIONS

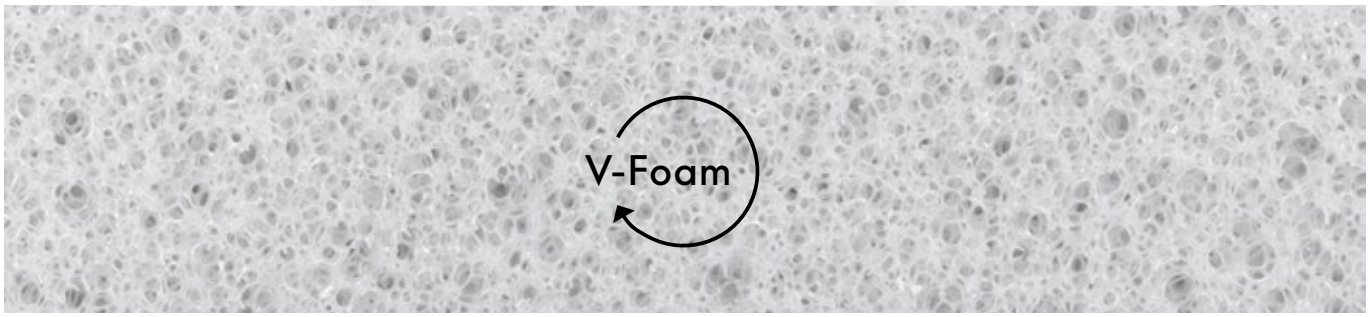

Slow Chair

Slow Chair Ottoman (knit)

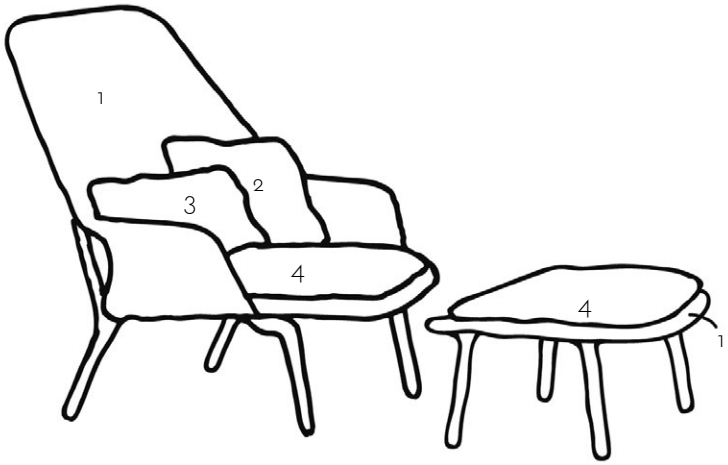

Developed jointly by Vitra and BASF, V-Foam is the world's first economically recyclable polyurethane foam.

Standard polyurethane foam (PU foam) is derived from fossil fuels and utilised extensively worldwide. Its recycling process is very energy-intensive and uneconomical.

V-Foam, on the other hand, can be melted, reprocessed and returned to the material cycle in its entirety for use in new products. Vitra will gradually incorporate V-Foam for all its upholstered furniture containing moulded foam from 2025.
