DESCRIPTION

Created for GUBI by Linda Korndal's studio, Toko Among Friends, Keen is a modular shelving system defined by architectural structure, expressive personality, and quiet adaptability. Designed to evolve with its user, Keen expands both vertically and laterally through an intuitive rod-and-bracket system that keeps the composition visually complete at every stage. With seven core modules, frame options in black brass or satin-polished stainless steel, and shelves in FSC-certified black-brown stained ash, FSC-certified ALPI veneer, or cool-gray stained glass, the system brings sculptural rhythm, material depth, and emotional resonance to homes, hospitality settings, and workspaces alike.
