FRITZ HANSEN

PK3™

Product Fact Sheet

PK3™

The PK3™ chair is a rediscovered design by Poul Kjærholm that entered the Fritz Hansen collection more than seventy years after it was originally conceived. The PK3™ is crafted with two mirror-laminated veneer shells with optional front upholstery joined with a distinct aluminium connecting element and a tubular steel base. The result is a chair of poised geometry and refined proportions - well-suited for residential settings and public spaces alike.

DESIGNER / YEAR OF DESIGN
Poul Kjærholm, 1954

ABOUT THE DESIGNER
Poul Kjærholm was a trained cabinet maker and continued his studies at the Danish School of Arts and Crafts in Copenhagen. He had a particular interest in different construction materials, especially steel, which he considered a natural material with the same artistic fineness as other natural materials.

Poul Kjærholm was first employed at Fritz Hansen for about a year, where he designed a number of noteworthy chair prototypes. In 1955, Poul Kjærholm initiated his collaboration with manufacturer Ejvind Kold Christensen, which lasted until Kjærholm's death in 1980. In 1982, Fritz Hansen took over the manufacture and sales of "The Kjærholm Collection", which was developed over the period 1951 to 1967.

MODELS
PK3

MATERIAL
Shell: The shell is made of pressure moulded veneer with the option of adding front upholstery in textile or leather. The backrest bracket is made of pressure moulded zamak with a brushed surface finish.

Base: The base is made of 14 mm steel tubes with 4 legs and leg ferrules of black synthetic material. The base is mounted with black support spacers.

PK3™ is available in 2 seat heights:
43 cm/17.3 in & 46 cm/18.1 in

MATERIALS IN %:

With upholstery:
Plywood: 36%
Steel: 51%
Zamak: 5%
TPE: 3%
PA: 2%
Foam: 1%
EVA: 1%
