Rocking Glass

- A different definition of tipsy, the Rocking Glass features a curved bottom that allows it to rock without spilling over. Suitable for cocktails or as a decorative accessory, it’s a fresh take on the simple tumbler.

- The rounded shape on Rocking Glass gives you the feeling of holding a sphere in your hand, and when you put it down, the rocking movements call forth a smile. The Rocking Glass is sturdy and is made to last. You can put just about anything in it; coffee, tea, drinks, snacks, tealights or a little flower.
